

SPECIFICATION: Equipment Case Labeling

1.0 General Requirement:

L3-GCS requires identification labels on all equipment cases. This specification describes the label placement, layout and formatting.

2.0 Placement:

The labels are to be attached to the exterior of the equipment cases. They are to be affixed using stainless steel, black oxide pan head #4-40 screws and located as shown in the equipment production detail.

3.0 Mechanical Size and Material:

3.1 General layout and size of case labels is shown in Figure 1.

3.2 Material to be .015 inch thick alloy 1100 per UNSA91100, PN: 87-1006844. Anodize, color black pressure sensitive adhesive with peel off liner on the farside.

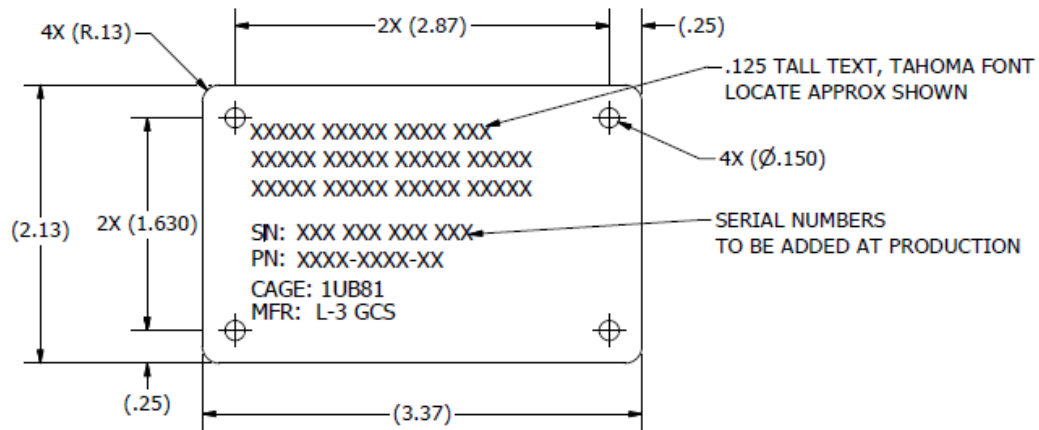

Figure 1

4.0 Text Formatting:

4.1 The text format is to be 1/8" tall Tahoma font.

4.2 All text is to be capitalized with the exceptions of brand names, for example: iDirect or e800, etc.... Markings shall be white on a black background.

5.0 Label Information:

The information to be printed on the labels: (Figure 2)

- Case Description (provided by PE/PM)
- Part Description
- System or Kit Serial Number
- Part Number
- Manufacturer Information
